SUMMARY OF QUALIFICATIONS

- Large experience in **database/data warehouse** and **SQL** (query language).
- Great with **Python** programming in **VS Code**. Created executable from codes, made **web API** requests to retrieve data, created **GUI's**, developed **REST API's**, loaded **Excel** and **XML** files into **pandas** dataframes, read and wrote to Excel files with **openpyxl**, created formatted **PowerPoint** slides automatically, created **virtual environments**, automated **batch jobs**, etc. **All can be viewed on my Github**.
- Extracted data from **Hadoop** with Dremio/Hive and created VDS's.
- Fitted **logistics regression** model for delinquency risk using **PySpark ML**.
- Created AVM to predict bare land value of properties in Orange county, CA.
- Independently created logistics regression model to score risk of auto policyholders. The model was deployed.
- Created **workflows** in **n8n** for Gen AI.
- Exposure to Deep Learning and NLP modules in Python, such as Pytorch, Transformers and Pandas.
- Worked on insurance pricing models in partnership with consultancies.
- **Expert at SAS** (**Enterprise Guide** and **Viya**) -- created **stored processes** and **ETL's**, wrote advanced code to produce tables and reports, and truly **mastered SAS macros**. Created performance dashboard with SAS/GRAPH and reports with **Proc Report**.
- Strong with **Machine Learning** models and **data analytics** and familiar with **actuarial analyses** and **actuarial reports**.
- Proven ability to quickly learn complex tasks and deliver results timely and effectively, especially now with the aid of AI.
- Expert at **MS Excel**, created advanced spreadsheets with **VBA macros**, **automated charts and graphs**.
- Most of my experience is in the **insurance** industry (10+ years). Created a wide variety of **loss triangles**, estimated **ultimate claims** from LDF's, calculated ceded losses from **reinsurance** contracts, created predictive models and reports.
- Familiar to **accounting principles** (GAAP, STAT), created **YTD summary reports** to support quarterly filings (10-Q and 10-K) using the **general ledger database** and performed **account and profit center** level **reconciliations** with it.
- Graduated in **Math / Statistics** from the **best university in Brazil** (**U of São Paulo**).
- Very analytical, **self-taught**, can work independently, created new formulas in math (e.g. <https://arxiv.org/html/1810.07877v7>).
- **U.S. citizen** (had a **green card** through **NatGen** previously).

SOFTWARE

- **Databases:** **Oracle**, **Teradata**, **SQL Server / SSMS** and their **IDE's**.
- **Data Warehouse:** **Snowflake**, **Databricks**, **PySpark**, **Hadoop**, **Dremio**.
- **Programming:** **Python**, **VBA**, **VBScript**, Unix/Windows batch scripting.
- **Cloud Computing:** Working knowledge of **AWS**, **Azure** and **GCP**.
- **SAS:**
 - Platforms: Unix, **Linux**, Windows Server and **Viya**.
 - Modules: **BASE**, **STAT**, **GRAPH**, **ACCESS**, **CONNECT**.
 - Expert knowledge of most used SAS procs, including **Proc Report**.
 - Advanced **macro language**. **Stored processes**.
- **BI / Predictive Modeling:** **SAS Enterprise Guide**, **Power BI**, **Python**.
- **Operating Systems:** **Unix**, **Linux**, Windows.
- **Code Editors:** **VS Code**, Jupyter Notebook.

- **MS Office:** Excel, PowerPoint, OneNote, SharePoint.
- **Other:** Git, regular expressions, Jira, Putty, XML, JSON.

PROFESSIONAL EXPERIENCE

Wells Fargo (banking)

Data Science / Data Analyst 5 (contract / hybrid)

10/2022 – 12/2025

- **Second project: 07/2025 through 12/2025**
 - Worked on AML remediations (CIP / BO / CDD / KYC).
 - Built AML remediation populations (Trust, NRM4 and transportation assets).
 - Created population identification workbooks and waterfall charts and presented them to senior directors for approval.
 - Created code test scripts and worked with code testers to validate the code.
 - Developed code to create ad-hoc time-sensitive data extracts and reports.
 - Worked with risk rating predictive models.
 - **Recognized with a full-time offer at project completion.**
- **First project: 10/2022 through 01/2025**
 - Worked on **customer remediations**, responsible for the creation of the final artifacts from which refunds and letters are issued to customers as required by **regulators**, following strict **Confluence** procedures.
 - Managed **SAS** code used to create final remediation artifacts, made changes to the code to add **enhancements**, **optimize performance** and minimize the number of **defects** and findings in **peer reviews**. As an example of enhancement, when a new analyst takes over a remediation, all the **artifacts** and **SAS** tables created by the previous analyst are **automatically** saved to a new subfolder as **backup**.
 - Created **ETL**'s to produce new artifacts by mapping fields from the execution data requirements (EDR) to data tables. Contributed to design **artifact layouts**.
 - Used **GitHub** for code version control and sharing and **DMS** as a secure repository for storing and sharing artifacts.

Truist, Charlotte, NC (banking)

Data Analytics SQL/Python (contract / remote)

09/2021 – 03/2022

- Created rules based **decision tool** for the compliance and data analysts to choose their optimal analytics application as a web form created in **Python**.
- Created and maintained current report on user accesses for the various **proprietary applications** and data repositories (**AD**, **ACL**), for **compliance**.
- Ran reconciliation between **ServiceNow/RITM** and data pulled from the **mainframe** to assess correctness of an automatic ticket creation process for abends (abnormal job termination), and presented findings with **PowerPoint**.
- Pulled reports from the **SAS grid** and from the **data lake/data warehouse** with **Snowflake** and produced **documentation** following internal **templates**.

Florida Blue, Jacksonville, FL (healthcare)

Data Analytics SAS/Python Developer (contract / remote)

04/2020 – 08/2021

- Developed **ETL** codes to extract data from **Oracle** and **DB2** and others, using **SAS 9.4** on **AIX** (Unix) and **Enterprise Guide**.
- Extracted data from multiple sources to create agent **fraud detection** analytics for the **SIU** dept with various metrics. Created **macro to automate** the formatting of the report for each metric using **Proc Report**.
- Automated and scheduled various **SAS ETL codes** in **Unix**, using a **SAS macro**.
- Used **HTML** syntax in **SAS** to compose rich text e-mail alerts.
- Combined **DOS**, **WinScp** and **VB** scripts to schedule codes and automate file

transfers between platforms.

- Created a neat **SAS stored process** for various canned reports.
- Created **visualizations** and **reports** using **Power BI** and **Python**.
- Gave **training** to team members on how to design **SAS stored processes**, covering how to create the **GUI** and how to handle the variable **user's inputs**.

National General (now Allstate), New York, NY (insurance)

Insurance Data Programmer / Data Manager

04/2015 – 12/2019

- **Reported to the holding company's chief actuary.**
- **Planned and created** datasets in **SAS** by combining data from various databases from which loss triangles and **data analytics** were produced.
- Created **actuarial loss triangles** used in reserving analyses with **SAS macros**, and reconciled the numbers with the company's **general ledger**.
- Created quarterly company-wide **YTD summary report** in Excel using **general ledger data** pulled with **Oracle BI Discoverer** to support quarterly filings and the annual report preparation (**10K**, **10Q**), for the **SEC** and other **regulators**. Later, **BI Discoverer** was replaced by straight **SQL** queries on an **SSMS linked server**.
- Using **SAS**, performed **statistical data analyses** to track performance of products, lines of business and segments.
- Mastered the internal **claims data system** of the company (EPIC), stored in **Oracle** and **SQL Server** databases, as well as legacy data, and moved the data to the **SAS server** to create reports with **SAS macros** and **SAS code**. These reports were used internally or provided to consultants, **auditors** and **regulators**.
- Created complete documentation about work done on legacy data from acquired companies.

AIG, New York, NY (insurance)

Data Scientist / SAS Programmer (contractor / FTE)

12/2011 – 12/2014

- Planned and extracted data from multiple sources (**mainframe**, **DB2**, **SQL Server** and **Oracle**) to produce **enhanced tables** used in all **reports** and **models** and **processes**, using **ETL** and **SAS/Access** interface to **OLE DB** and **ODBC**.
- Created **ETL's** to read **VB/VSAM** files on **IBM mainframe** and load them into **SAS** tables on Windows. These files became the data foundation of the **Global Actuarial Pricing** department.
- Wrote **SAS macro** to create a wide variety of **loss triangles** which were used to derive **LDF's** and **estimate** the **ultimate claims**.
- Worked in the **deep dive** and **profitability analyses** of the book of business, by extracting data on **losses**, **premium**, **policy** and **insured attributes** to generate various reports and metrics and to monitor the **performance** of the various **lines of business and segments**.
- Alongside the actuaries, helped to build a **scoring model** called **AQI (Account Quality Index)**.
- Worked with Deloitte consultants and provided them with **loss triangles** used as inputs into the Commercial Auto **pricing tool**. Also worked with Deloitte on the **Specialty Worker's Comp model**, making sure that deliverables such as **SAS codes**, **data** and results of the **predictive model** met the requirements.
- Created and scheduled weekly **jobs** to extract submission data entered by underwriters into the **AQI model** and update a **Qlikview dashboard**.

EDUCATION

Masters's in **Statistics** - **University of São Paulo, Brazil**

Bachelor's in **Statistics** - **University of São Paulo, Brazil**

Bachelor's in **Mathematics** - **University of São Paulo, Brazil**
