SUMMARY OF QUALIFICATIONS

- Extensive experience with **databases**, **data warehouses** and **SQL**.
- Strong **Python** skills using **VS Code**. Ran **SQL** queries, made **web API** requests to retrieve data, created **GUI's**, developed **REST API's**, loaded **Excel** and **XML** files into **pandas** dataframes, read and wrote to Excel files with **openpyxl**, created formatted **PowerPoint** slides automatically, created **virtual environments**, automated **batch jobs**, etc. [All can be viewed on my GitHub](#).
- Extracted data from **Hadoop** with Dremio / Hive and created VDS's.
- Fitted **logistic regression** models using both **SAS** and **PySpark ML**.
- Created **workflows** in **n8n** for Gen AI.
- **Expert at SAS** (**Enterprise Guide** and **Viya**) -- adapted legacy SAS code for Viya, created **stored processes** and **ETL's**, wrote advanced code to produce tables and reports, and truly mastered **SAS macros**. Created dashboard with SAS/GRAPH and reports with **Proc Report**.
- Strong with **Machine Learning** models and **data analytics** and familiar with **actuarial analyses** and **actuarial reports**.
- Expert at **MS Excel**, created advanced spreadsheets with **VBA macros**, **automated charts** and **graphs**.
- Most of my experience is in the **insurance** industry (15+ years). Created a wide variety of **loss triangles**, estimated **ultimate claims** from LDF's, calculated ceded losses from **reinsurance** contracts, calculated earned premiums and created reports on **loss ratio** and **in-force policies**, among others. Performed **data reconciliation** with the general ledger.
- Exposure to **accounting principles** – using the **GL** Oracle database, created **YTD summary reports** with array formulas in **Excel** to support quarterly filings (10-Q and 10-K) and performed account and profit center level reconciliations with it.
- Graduated in **Math / Statistics** from the **best university in Brazil** (**U of São Paulo**).
- Very analytical, self-taught, can **work independently**, created new formulas in math (e.g. <https://arxiv.org/html/1810.07877v7>).
- **U.S. citizen** (had a **green card** through **NatGen** previously).

SOFTWARE

- **Databases:** **Oracle**, **Teradata**, **SQL Server / SSMS** and their **IDE's**.
- **Big Data:** **Snowflake**, **Databricks**, **PySpark**, **Hadoop**, **Dremio**, **Hive**.
- **Programming:** **Python**, **VBA**, **VBScript**, **Unix/Windows batch scripting**.
- **Cloud:** Working knowledge of **AWS**, **Azure** and **GCP**.
- **SAS:**
 - Platforms: **Unix**, **Linux**, **Windows Server** and **Viya** (Cloud).
 - Modules: **BASE**, **STAT**, **GRAPH**, **ACCESS**, **CONNECT**.
 - Expert knowledge of most used **SAS PROCs**, including **Proc Report**. Advanced **macro language** and **stored processes**.
- **BI / Predictive Modeling:** **SAS Enterprise Guide**, **Power BI**.
- **Code Editors:** **VS Code**, **Jupyter Notebook**.
- **Other:** **Excel**, **PowerPoint**, **SharePoint**, **Git**, **Regex**, **Jira**, **XML**, **JSON**.

PROFESSIONAL EXPERIENCE

Wells Fargo (**banking**)

Senior Data Analyst (**contract** / **remote** / **hybrid**)

10/2022 – 12/2025

- **Second project** (**hybrid**)

- Worked on **AML / Financial Crimes** remediations (CIP / BO / CDD / **KYC**).
- Built AML remediation populations (Trust, NRM4 and transportation assets).
- Created population identification workbooks and waterfall charts and presented them to senior directors for approval.
- Wrote complex **optimized SQL** queries to extract data from **Hadoop** using **Dremio** and **Hive** and from various databases (**Teradata**, **Oracle**, SQL Server, DB2, etc.). Was a go-to person for challenging technical questions.
- Interpreted complex business requirements and translated them into efficient SQL and SAS logic for data extraction, validation, and reporting.
- Developed **SAS** and **SQL** code for ad-hoc data extraction, validation, reconciliation, and regulatory reporting.
- Created SQL/SAS **validation** test scripts and partnered with **QA** to validate code, investigate discrepancies, and document expected results.
- Validated and reconciled **AML** remediation populations across multiple source systems, investigating record-level discrepancies and documenting root causes prior to production release.
- Performed data quality validation and reconciled SQL/SAS outputs against business requirements to ensure accuracy and completeness of remediation populations.
- Partnered with business stakeholders and **QA** to analyze, document, and resolve data discrepancies, communicating findings in clear business terms.
- Supported defect identification, root cause analysis, and regression testing during code enhancements, reducing production issues and improving data quality.
- Produced well-documented validation artifacts and **SQL/SAS** evidence supporting remediation decisions and regulatory deliverables.
- Modified SAS programs to execute in the SAS **Viya** environment.
- **First project (remote)**
 - Worked on **customer remediations**, responsible for the creation of the final artifacts from which refunds and letters are issued to customers as required by **regulators**, following strict **Confluence** procedures.
 - Managed **SAS** code used to create final remediation artifacts, made changes to the code to add **enhancements**, **optimize performance** and minimize the number of **defects** and findings in **peer reviews**. As an example of enhancement, when a new analyst takes over a remediation, all the **artifacts** and **SAS** tables created by the previous analyst are **automatically** saved to a new subfolder as **backup**.
 - Created **ETL**'s to produce new artifacts by mapping fields from the execution data requirements (EDR) to data tables. Contributed to design **artifact layouts**.
 - Used **GitHub** for code version control and sharing and **DMS** as a secure repository for storing and sharing artifacts.

Truist, Charlotte, NC (banking)

Data Analytics SQL/Python (contract / remote)

09/2021 – 03/2022

- Created rules based **decision tool** for the compliance and data analysts to choose their optimal analytics application as a web form created in **Python**.
- Created and maintained current report on user accesses for the various **proprietary applications** and data repositories (**AD**, **ACL**), for **compliance**.
- Ran reconciliation between **ServiceNow/RITM** and data pulled from the **mainframe** to assess correctness of an automatic ticket creation process for abends (abnormal job termination), and presented findings with **PowerPoint**.
- Ran **SQL** queries in **Snowflake** to extract data from the **data lake/data warehouse**.
- Created reports using the **SAS grid** and produced **documentation** following

internal templates.

Florida Blue, Jacksonville, FL (healthcare)

SAS/Python Developer (contract / remote)

04/2020 – 08/2021

- Developed ETL code to extract data from Oracle and DB2 and others, using SAS 9.4 on AIX (Unix) and Enterprise Guide.
- Extracted data from multiple sources to create agent fraud detection analytics for the SIU dept with various metrics. Created macro to automate the formatting of the report for each metric using Proc Report.
- Automated and scheduled various SAS ETL jobs in Unix, using a SAS macro.
- Used HTML syntax in SAS to compose rich text e-mail alerts.
- Combined Windows batch, WinScp and VB scripts to schedule jobs and automate file transfers and moving data between platforms using SFTP.
- Created a neat SAS stored process for various canned reports.
- Created visualizations and reports using Power BI and Python.
- Gave training to team members on how to design SAS stored processes, covering how to create the GUI and how to handle the variable user's inputs.

National General (Allstate), New York, NY (insurance)

Insurance Data Programmer / Data Manager

04/2015 – 12/2019

- Reported to the holding company's chief actuary.
- Mastered the claims data system of the company (EPIC) and legacy data stored in Oracle and SQL Server databases.
- Planned and created datasets in SAS by extracting and combining data from various databases, from which loss triangles and data analytics were produced.
- Created actuarial loss triangles used in reserving analyses with SAS macros, and reconciled the numbers with the company's general ledger.
- Created quarterly company-wide YTD summary report in Excel using general ledger data extracted with Oracle BI Discoverer to support quarterly filings and the annual report preparation (10K, 10Q), for the SEC and other regulators.
- Participated in the ATLAS project, with a goal to capture claim and policy level data into the GL Oracle database.
- Extracted data from the SAS server to create reports with SAS macros and code. These reports were used internally or provided to consultants, auditors and regulators.
- Using SAS, ran statistical data analyses to track performance of products.
- Created complete documentation about work done on legacy data from acquired companies.

AIG, New York, NY (insurance)

Data Scientist / SAS Programmer (contract / FTE)

12/2011 – 12/2014

- Planned and extracted data from multiple sources (mainframe, DB2, SQL Server and Oracle) to produce enhanced tables used in all reports and models and processes, using ETL and SAS/Access interface to OLE DB and ODBC.
- Created ETL's to read VB/VSAM files on IBM mainframe and load them into SAS tables on Windows. These files became the data foundation of the Global Actuarial Pricing department.
- Wrote SAS macro to create a wide variety of loss triangles used to derive LDF's and estimate the ultimate claims.
- Worked in the deep dive and profitability analyses of the book of business, by extracting data on losses, premium, policy and insured attributes to generate various reports and metrics and to monitor the performance of the various lines

of business and segments.

- Created smart **algorithm for linking policies** based on insured and policy characteristics in **SAS**. This policy linking was the basis for the creation of a **scoring model** called AQI (**Account Quality Index**).
- Worked with Deloitte consultants and provided them with **loss triangles** used as inputs into the Commercial Auto **pricing tool**. Also worked with Deloitte on the **Specialty Worker's Comp model**, making sure that deliverables such as **SAS code, data** and results of the **predictive model** met the requirements.
- Created and scheduled weekly **jobs** to extract submission data entered by underwriters into the **AQI model** and update a **Qlikview dashboard**.

EDUCATION

Master's in **Statistics** - **University of São Paulo, Brazil**

Bachelor's in **Statistics** - **University of São Paulo, Brazil**

Bachelor's in **Mathematics** - **University of São Paulo, Brazil**
